

The Free & Equal Elections Foundation is a dynamic new non-partisan organization dedicated to reforming ballot access laws across the United States.

Many states have restrictive requirements that make it difficult for anti-establishment candidates to place their names on the ballot.

Free & Equal challenges these laws through lobbying of state legislators, court challenges and initiatives.

Free & Equal strives to educate the public and the media about how ballot access is fundamental to the health of our democracy.

Free & Equal sponsors debates that include ALL ballot-qualified candidates. The only Presidential and Vice-Presidential debates held during the 2008 election were sponsored by Free & Equal.

Free & Equal hosts national election reform conferences, bringing together people and organizations from across the political spectrum.

We will strive to create a system where all elections are free and all citizens are equal in their ability to participate in elections.
